PROFILE

I'm Avinash Madhukar Mundhe, a Computer Science and Engineering (Artificial Intelligence) graduate passionate about Full Stack Web Development. I have practical experience in web design and development and am eager to contribute.

PROJECTS

- **BMW Reimagined**
  Transformed BMW's website into a sleek, modern platform with a black theme, interactive UI, smooth animations, and advanced car filtering using HTML, Tailwind CSS, JavaScript, GSAP, and Locomotive JS.
- **99Invites - Wedding Invitation Website**
  Created an advanced wedding invitation website with a unique mobile view, smooth horizontal scroll, and customizable themes for a personalized experience.
- **Significo Clone**
  Recreated the Significo website using HTML, Tailwind CSS, JavaScript, and GSAP, demonstrating my web development and UI/UX design skills.
- **DUO Studio Clone**
  Developed a DUO Studio website clone using HTML, Tailwind CSS, JavaScript, and GSAP, highlighting my skill in replicating complex web designs and functionalities.
- **Rejouice Clone**
  Created a Rejouice website clone using HTML, Tailwind CSS, JavaScript, and GSAP, showcasing my ability to replicate intricate web designs and functionalities.
- **Cuberto Clone**
  Reproduced the Cuberto website using HTML, Tailwind CSS, JavaScript, and GSAP, showcasing my skill in recreating advanced web designs.

WORK EXPERIENCE

Tech King Solutions India — **FEB 2024 - JUNE 2024**

Full Stack Web Development Intern (Remote)

- Successfully completed a 20-week online internship focused on Full Stack Web Development, acquiring practical skills in both front-end and back-end technologies.
- Actively contributed to the development and enhancement of web applications, utilizing technologies such as HTML, CSS, JavaScript, and various back-end frameworks.
- Collaborated remotely with senior developers and cross-functional teams, delivering high-quality code and meeting project deadlines.

ACHIVEMENT

Reimagined Hackathon - Sheryians Coding School (2024)

- Successfully advanced to the second round of the Reimagined Hackathon by Sheryians Coding School, showcasing innovative web design and development skills.
- Ranked in the top 3 in India for the first-round project, which involved reimagining the BMW website with a modern, interactive design and a black-themed user interface.

INTERESTS

- **Graphic Design:** Enjoy combining graphics with web development to make websites visually appealing.
- **UI/UX**: Like making websites easy to use and look good, always learning more about it.
